

# CAPABILITIES STATEMENT

**PARTNER WITH ACP FOR YOUR NEXT PROJECT**

We offer experience and help you can count on, coupled with capabilities to rival one of Australia's biggest road safety barrier and corrugated steel pipe, tunnels & bridge structures suppliers. Partnering with ACP for all your roadside w-beam guardrail, thrie-beam guardrail, end terminals, wire rope barrier, permanent crash cushions, median steel gates, corrugated steel pipe, tunnels & bridge structures gives you access to a range of benefits including:

End to end supplies and services for your road safety barrier and corrugated steel structure needs.

In-house manufacturing coupled with ethical sourcing and in the case of the steel structures and MSE walls, design is included too.

Contract pricing and product selections customised for your business and needs.

A flexible and reliable supply chain that celebrates diversity.

## HOW WE CAN HELP

As a supplier with over 20 years' experience in the civil sector, we understand your business. Providing prompt and seamless service is our key focus, meaning you can get on with your day without worrying about trivial supply issues.

Our credibility as a trusted supplier is strengthened time and time again as we continue service Australia's biggest civil, infrastructure and private construction projects. To chat to one of our team about specific requirements for your next project, give ACP a call on **1800 724 172**.

## BENEFITS OF CHOOSING ACP

### High quality brands

ACP carries the best in class MASH level roadside guardrail & terminals, permanent crash cushions, wire rope barrier, median steel gates, corrugated steel pipe, tunnels & bridge structures and more. With leading proprietary products and brands such as SENTRY W-Beam & ThrieBeam, SENTRYLINE-M Wire Rope, Lindsay Transportation Solutions, Atlantic Civil Products, Margaritelli Ferroviaria and much more, you can be sure the products you order will stand up to the task.

### In-house manufacturing coupled with ethical sourcing

We manufacture our own roadside proprietary/public domain guardrail, guardrail end terminals, and more right here in our facility in Sydney. We also source products from quality, reputable manufacturers around the world to bring you the best in class civil roading and structure products. Our supply chain team actively embraces diversity and innovation, and we're constantly seeking new ways to fulfil our customers needs.

### Local supply with regional locations across Australia & New Zealand

Fulfill your local content requirements with ACP's flexible supply options – distribution can be coordinated from our locations in New South Wales, Victoria, Queensland, and Western Australia. We also export to the Oceania.

### Sustainability and environmental focus

We acknowledge our responsibility as a manufacturer and supplier to raise awareness and understanding of environmental sustainability, reducing our environmental footprint and embedding a 'sustainability' culture into the workplace. As a manufacturer of numerous metal products, the operations team at ACP has invested large amounts of time and energy into refining our scrap metal procedures, partnering with local scrap metal recyclers to ensure we are able to recycle 100% of our metal waste created from production. Combined with ACP's efficient workplace practices, we have significantly reduced our carbon footprint and will continue to do so.

### Contract pricing customised to your needs

If your project calls for a substantial volume of product, ACP can offer economies of scale for large orders. Plus, with the option of highly competitive contract pricing, we can leverage economies of scale with our suppliers, getting you the best deal possible.

### End to end supplies for every aspect of your road safety barrier needs

Our product range and customer service are all about making life easier for construction contractors and ultimately make the roads safer for road users. That means we offer products that are tested to the highest standards, easy to assemble, faster to install and designed to protect.

### MASH Tested products to meet the highest standards

ACP carries a full range of MASH tested products from Test Level 1 to Test Level 4 products. Our technical team works with the industry leading designers and testing houses to offer leading MASH tested products approved by Austroads and all Australian state road authorities. We continuously work in research and development to deliver the latest in road safety barrier performance.
